

# POR TIERRAS DE ALBACETE

## Ruta nº 8 “CAMINO DE LA MANCHUELA”

### **CÁMARA DE COMERCIO E INDUSTRIA Albacete**

**Escala aproximada 1: 180**

**Angel AGUSTÍN – Jesús ARRIBAS**

Este singular edificio se construyó en los años veinte bajo la dirección del arquitecto Julio Carrilero, colaborando en la decoración Ramiro Undabeitia. Su construcción se inspira en soluciones de tipo renacentista español, según un modelo muy común en la época, donde el renacimiento salmantino fue motivo de inspiración a otros artistas de esos años. El chalé repite modelos que fueron corrientes en la costa santanderina.

El edificio fue vivienda de la familia Fernández-Fontecha e incluso sede del Gobierno Civil durante varios años. En 1988 fue adquirido y remodelado para ser la nueva sede de la Cámara de Comercio e Industria.

### **INSTRUCCIONES DE MONTAJE**

- Antes de doblar conviene marcar las líneas con la punta de unas tijeras, teniendo cuidado de no apretar demasiado.
- Si vas siguiendo el orden de la numeración te será más fácil el montaje.
- Ten mucho cuidado en aquellas piezas complicadas. Puedes construirte tus propias herramientas de montaje con alambres, pinzas del pelo, palillos, etc.
- Una vez terminada la maqueta debes recortar y pegar en la base el recuadro con texto.
- Signos:

Pegar las piezas que se indican.

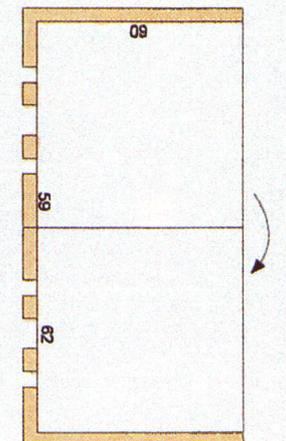

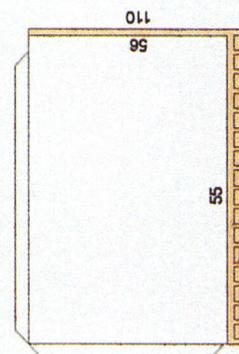

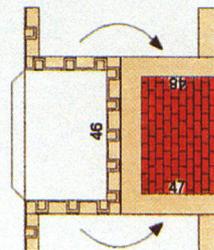

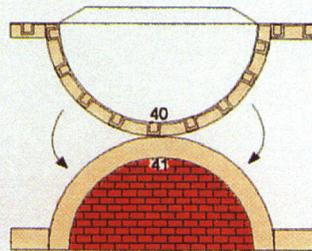

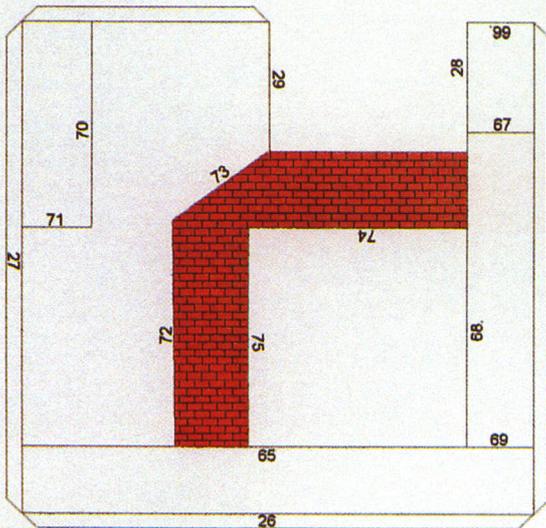

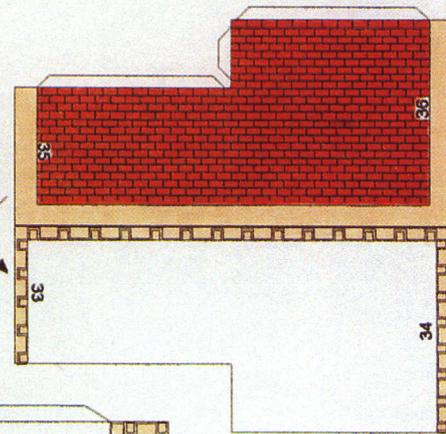

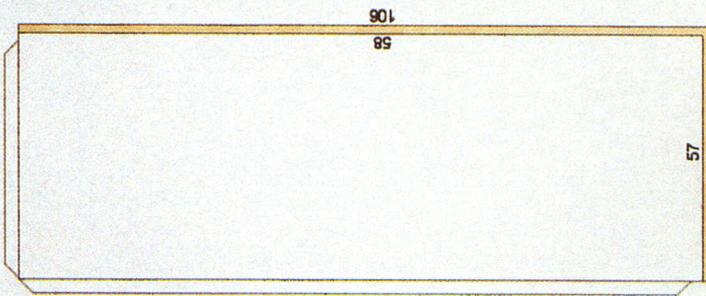

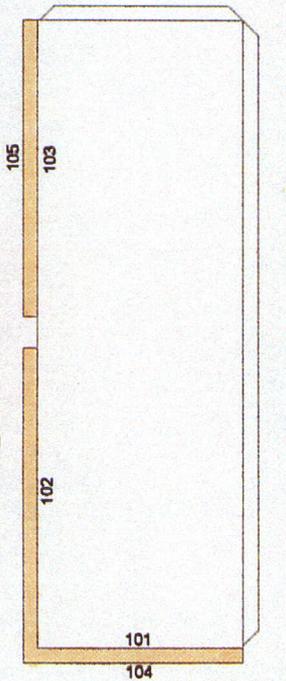

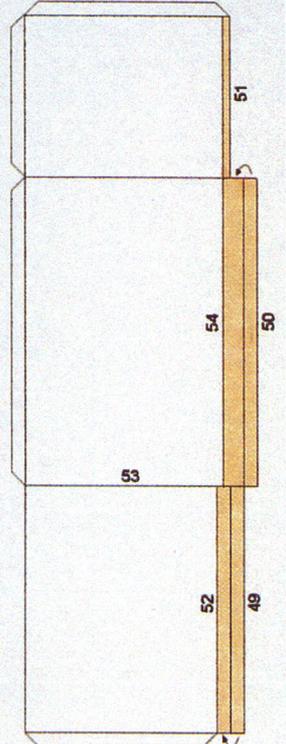

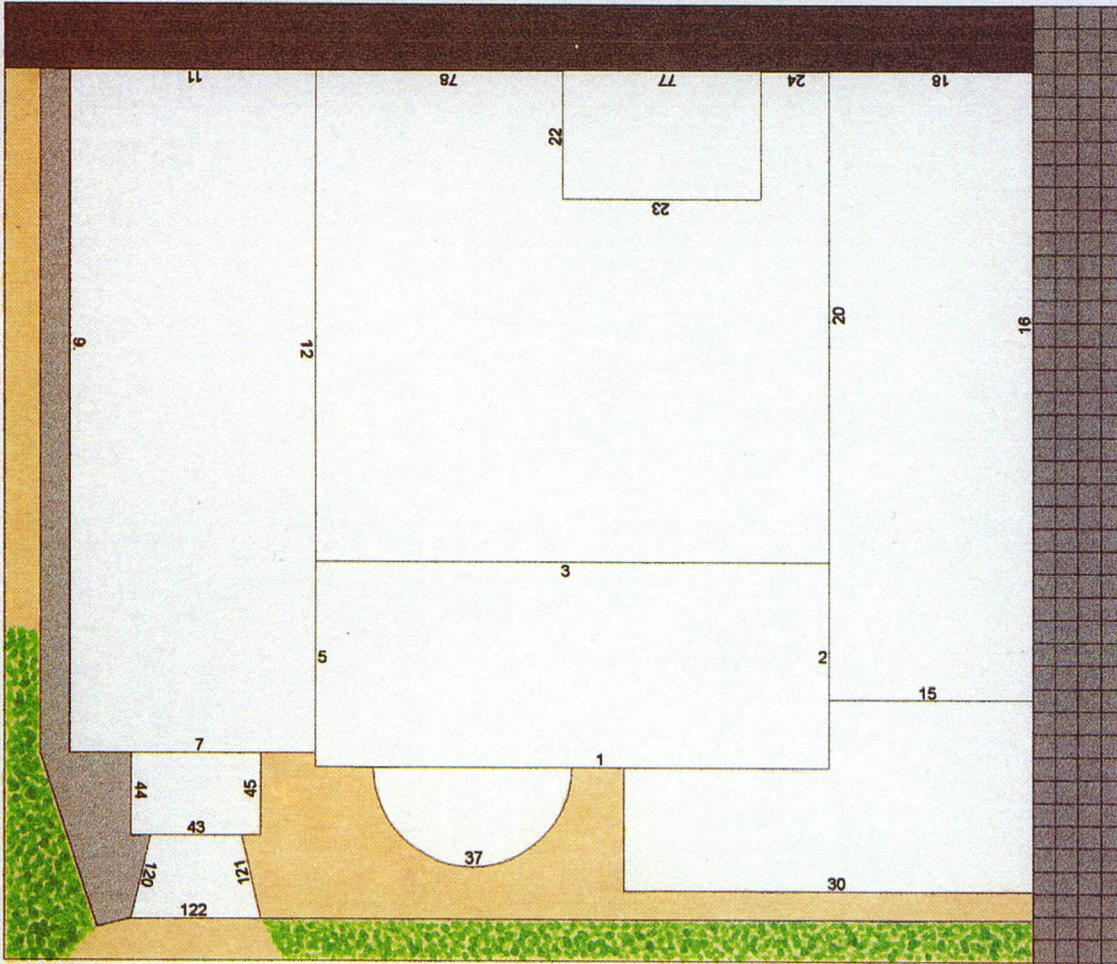

Doblar y pegar detrás de la misma pieza.
